Forms and Reporting Update

Ron Sherron March 14th, 2005

Article 15. Forest And Range Management Burns

http://www.azdeq.gov/environ/air/smoke/fir es.html

Form Updates

- Burn Accomplishments Form
- Annual Registration Form

Burn Accomplishments Form

- A Burn Accomplishment must be filled out by each burner for each Burn requested.
- Must be submitted to ADEQ by 2 p.m. of the business day following the burn

Burn Accomplishments (cont.)

- The Following information should be included:
 - Any known conditions or circumstances that could impact the Daily Burn decision process
 - Date, location, fuel type, fuel loading, acreage accomplishments.
 - ERT's and SMT's the F/SLM used to reduce emissions or manage smoke from the burn.

Burn Accomplishments Form

Daily Burn Accomplishment Form	Contact Number:
Opdated 03/04/05	Contact Name:
Please submit accomplishment forms the day following ignition. Submit only one accomplish	hment for per burn for each ignition date.
BURN NAME:	
BURN NUMBER:	
IGNITION DATE: (MM/DD/YY)	
ACREAGE TREATED: Area for which management objective(s) were achieved	d.
ACREAGE BURNED: Area blackened for broadcast burns only, not to exceed the	he acreage treated.
ACREAGE ERT(s) USED: Area in which emission reduction techniques were	used.
BURN LOCATION: (TT/RR/SS or SS-SS)	
BURN DURATION: (Hours)	
IGNITION DURATION: (Minutes) Non-piled Activity fuels only	
DEAD FUEL MOISTURE: (%) 10 hour	
DEAD FUEL MOISTURE: (%) 1000 hour	
DUFF FUEL MOISTURE: (%) (OPTIONAL) Natural fuels only	
FUEL MOISTURE METHOD: 1) NFDRS 2) Measured 3) Both	
DAYS SINCE LAST RAINFALL: Non-piled activity fuels only.	
SNOW-OFF DATE: (MM/YY) Non-piled activity fuels only.	
SMT's Permanent Fuel Exclusion ☐ Temporary Fuel Exclusion ☐	Increased Combustion Efficiency
Planned Ignition 3/15-9/15 ☐ Ignition before 3:00 PM ☐ Reducing	g Fuel Production□ Maintenance Burn □
Ignited Under Adequate Ventilation Reducing the Area Burned	Ignition before New Fuels Appear
ERT's Pre-Burn Fuel Removal ☐ Concentration Burning ☐	Ungulates 🗆
Under-burn before litter fall ☐ Burn Before Green Up ☐ Isolating Fu	uels□ Pile and Wind Row Burning □
Chemical Treatment Mechanical Processing Mass Ignition	
Rapid Mop-Up Mosaic Burning	Air Curtain Incinerators
DIURNAL PLUME CHARACTERISTICS:

Wildland Fire Use and Wildland Fire Updates

Wildland Fire Reporting

■ F/SLM in whose jurisdiction a wildfire occurs shall make available to ADEQ no later than a day after a threshold has been met: the location, an estimate of predominant fuel type and quantity consumed, and an estimate of the area blacked that day.

Wildland Fire (cont.)

Reporting Thresholds:

>100 Acres per day in timber or slash fuels

>300 Acres per day in brush or grass fuels

Wildland Fire Use

■ F/SLM shall notify ADEQ as soon as practicable of any WFU incident projected to attain a size of 50 acres of timber fuel or 250 acres of brush or grass fuel

WFU (cont.)

■ Each incident that has been declared as an WFU the F/SLM shall complete and submit to ADEQ a WFU Burn Plan, as soon as practicable and no later than 72 hours.

WFU Burn Plan

- 1. An emergency telephone number that is answered 24 hours a day, seven days a week;
- Anticipated burn prescription;
- Anticipated smoke management prescription;
- The estimated daily number of acres, quantity, and type of fuel to be burned;
- The anticipated maximum allowable perimeter or size with map;
- Information on the condition of the area to be burned, such as whether it is in maintenance or restoration, its ecological function, and other indicators of fire resiliency;
- 7. The anticipated duration of the wildland fire use incident;
- The anticipated long-range weather trends for the site;
- 9. A map depicting the potential impact of the smoke. The potential impact shall be determined by mapping both the daytime and nighttime smoke path and down-drainage flow for 15 miles from the wildland fire use incident, with smoke-sensitive areas delineated. Mapping is mandatory unless waived either orally or in writing by ADEQ. The map shall use the appropriate scale to show the impacts of the smoke adequately; and
- 10. Modeling or monitoring of smoke impacts, if requested by ADEQ after consultation with the F/SLM.

WFU (cont.)

- Daily Status Reports shall be submitted to ADEQ for each burn that the fire burns 100 acres for timber or slash; >300 acres for brush or grass
- F/SLM shall include a synopsis:
 - Smoke behavior
 - Future daily anticipated growth
 - Location of the activity

WFU (cont.)

- Human initiated ignition:
 - Consult with ADEQ if ignition is anticipated to grow to more than 250 acres.
 - Emergency ignition do not require consultation with ADEQ
 - Emergency ignition:
 - Protection of public
 - Fire-fighter safety
